

Cymbal Brand Design Language — Complete Reference

IMPORTANT

This document captures **every design element** from the Cymbal Style Guide (Version 1.0, last updated 11.18.20). It is structured for an AI agent to generate on-brand marketing campaigns, UI designs, and collateral without access to the original PDF.

1. Brand Identity & Overview

Brand Name: Cymbal **Parent Entity:** Cymbal Group **Brand Architecture:** Endorsed / Branded House — all subsidiaries carry the "Cymbal" parent name **Founded:** 1970 (narrative year), headquartered in Minneapolis, Minnesota **Brand Personality:** Approachable, warm, geometric, modern, human-centric **Origin Note:** Cymbal is a Google Cloud demo brand created in 2020

2. Logo System

2.1 Wordmark — "Cymbal"

PROPERTY	SPECIFICATION
Typeface	ITC Avant Garde Gothic
Weight	Bold / Demi
Case	Title case: capital "C", lowercase "ymbal"
Special Character	The lowercase "y" is set in italic while all other letters are upright/roman. The italic 'y' has a distinctive swooping descender that curves right and extends significantly below the baseline, giving kinetic upward-leaning energy
Letterforms	Pure geometric forms — circular bowls on 'a' and 'b', even stroke widths, rounded arches on 'm', clean vertical stroke on 'l'
Allowed Colors	Black (#000000) and White (#FFFFFF) ONLY

2.2 Monogram — "((C"

PROPERTY	SPECIFICATION
Construction	Three geometric elements, left-to-right: (1) a smaller crescent/arc shape — partial circle, concave facing right; (2) a second, slightly larger crescent/arc — also concave facing right, nested concentrically; (3) a large uppercase "C" letterform (~270° arc) matching the ITC Avant Garde "C" from the wordmark
Visual Metaphor	Sound waves/vibrations emanating from the "C" — reinforcing the "cymbal" sonic concept
Reading	Horizontally compact, reads as a unified mark "((C"
Allowed Colors	Black (#000000) and White (#FFFFFF) ONLY

2.3 Logo Usage Rules

RULE	DETAIL
Color restriction	NEVER render wordmark or monogram in any color other than black or white
Co-placement	When wordmark and monogram coexist on the same surface, they must be at opposing corners and at highly contrasting sizes (one large, one small)
Lockup prohibition	NEVER combine monogram and wordmark as a single lockup side by side
Size restriction	NEVER use wordmark and monogram at similar sizes on the same canvas

2.4 Logo Placement Patterns

- Wordmark: typically top-left or bottom-right of compositions
- Monogram: persistent bottom-left footer element on section dividers and pages
- On photography: white wordmark overlaid on image, positioned upper-right or bottom-right

3. Icon Grid & Shape System

3.1 Icon Grid Construction

PROPERTY	SPECIFICATION
Grid format	Square canvas
Grid subdivisions	~8–10 equal cells per axis
Diagonal keylines	Corner-to-corner X diagonals
Circle system	Hierarchical nested circles — 1 full inscribed circle + quadrant-centered medium circles + smaller harmonically-scaled circles
Purpose	All icon shapes must snap to grid lines, circle arcs, and intersection points

3.2 Foundational Primitive Shapes

Three foundational shapes derived from the grid: 1. **Half-circle / Semicircle** — D-shape with flat edge and curved edge 2. **Stadium / Pill shape** — tall vertical rounded rectangle with 180° semicircular caps, ~3:1 height-to-width ratio 3. **Circle** — perfect circle, roughly half the diameter of the semicircle

3.3 Shape Library (~30+ shapes)

All shapes are rendered in **solid cobalt/royal blue (~#4355F5)**. The complete library includes:

Primitives: Circle, semicircle (multiple orientations), quarter-circle, square, rounded square (squircle), stadium/pill (horizontal and vertical), ring/donut (annulus)

Composites: Leaf/vesica piscis (almond/eye shape), fan/sector (~120–150° spread), teardrop/drop, arch/tombstone (rectangle with semicircular top), 4-point star/diamond star, crescent, comma/apostrophe, eye/marquise, horseshoe/open arch, egg/ovoid, dome/cap, rounded rectangle with one flat corner

Shape Characteristics:

- All derived from circles, arcs, and straight lines from the icon grid
- Corner radii always match grid-derived arcs — never arbitrary
- No outlines — all shapes are solid fills
- Shapes can be combined, rotated, scaled, and nested

3.4 Shape Usage Modes

MODE	DESCRIPTION
Shape as Logo	Combined to create subsidiary brand logos (1–4 shapes per logo)
Shape as Supergraphic	Single shape used at massive scale as a dominant visual element
Shape as Image Container	Photography masked/clipped into brand shapes (arch, semicircle, etc.)
Shape as Pattern	Single shape rotated and tiled in regular grids to create tessellating patterns

4. Subsidiary Logos

4.1 Subsidiary Logo Construction Rules

RULE	DETAIL
Shape count	Minimum 1, maximum 4 shapes per logo
Shape proportions	Shapes should share similar size and form
Overall feel	Simplicity and roundness
Brand quality	Approachability
Shape type	Geometric shapes (circles, rounded squares, etc.)

Don'ts:

-  Avoid sharp and overlapping shape combinations
-  Avoid highly contrasting shape sizes
-  Avoid combining too many shapes (max 4 per logo)

4.2 Subsidiary Wordmark Typography

PROPERTY	VALUE
Font	ITC Avant Garde Bold
Case	Title Case
Kerning	Optical
Letter Spacing	–4% (tighter than default)
Color	Black or White only
Usage Rule	ITC Avant Garde is reserved EXCLUSIVELY for subsidiary wordmark construction — never for general typesetting

4.3 Subsidiary Lockup Format

- **Icon** on the left (at smaller scale)
- **"Cymbal"** on the first line (top) — with the characteristic italic 'y'
- **Subsidiary name** on the second line (bottom)
- Both lines left-aligned to each other and to the right of the icon
- The "y" descender in "Cymbal" must NEVER cross below or intersect with the top (cap height) of the subsidiary name below

4.4 Complete Subsidiary Inventory

Subsidiary	Industry	Icon Description	Color Family
Cymbal Health	HCLS	Cross/plus shape from 4 rounded rectangular pill shapes, circle at top center	Dark navy + silver gray + slate blue + royal blue (4 shades)
Cymbal Labs	HCLS	Three circles of similar size in asymmetric cluster	Bright/vivid blue (monochromatic)
Cymbal Superstore	Retail	Large circle with smaller crescent above-left	Vivid red + warm peach/tan
Cymbal Shops	Retail	Three rounded squares in L-shape cluster	Crimson + dark maroon + bright orange
Cymbal Direct	Retail	Large "D" shape from semicircle with inner crescent	Pink-to-purple gradient (digitally native)
Cymbal Bank	FSI	Circle with four-pointed star cutout (vault/shield)	Rich green (monochromatic)
Cymbal Investments	FSI	Three ascending vertical bars (growth chart)	Dark-to-light green tonal range
Cymbal Insurance	FSI	Four-petaled flower/compass with center circle	Teal/cyan (monochromatic)
Cymbal Fintech	FSI	Abstract "F" / tech-inspired shape arrangement	Blue-to-green gradient (digitally native)

Digitally native brands (Direct, Fintech) use **gradients** in their logos to distinguish them from their digitally transforming counterparts.

5. Color Palette

5.1 Industry-Level Primary Colors

Industry	Primary Color	Approximate Hex
HCLS (Healthcare & Life Sciences)	Blue	~#0D5FFF / ~#1565FF
Retail	Red	~#CC0033 / ~#D4003A
FSI (Financial Services & Insurance)	Green	~#00B341 / ~#00B848

5.2 Subsidiary Color Swatches

HCLS — Blue Family

Subsidiary	Colors
Cymbal Health	Dark navy (~#1B2A4A), Muted grey-blue (~#B0B8C0), Slate blue-grey (~#5C6B7A), Deep royal blue (~#1A3A8F)
Cymbal Labs	Bright blue (~#0D5FFF) — monochromatic

Retail — Red Family

Subsidiary	Colors
Cymbal Superstore	Bright red (~#E63B2E), Muted tan/terracotta (~#D4976A)
Cymbal Shops	Deep burgundy (~#7B2040), Bright orange-red (~#FF5C2E)
Cymbal Direct	Lavender/purple (~#9B7EB8) → Pink/salmon (~#E8607A) gradient

FSI — Green Family

Subsidiary	Colors
Cymbal Bank	Very dark forest green (~#004D26)
Cymbal Investments	Dark teal green (~#0A5C3A), Light mint green (~#90EE90), Medium green (~#00994D)
Cymbal Insurance	Teal/seafoam green (~#5CC8B0)
Cymbal Fintech	Blue (~#80C0FF) → Lavender (~#A0A0FF) gradient

5.3 UI Color System (Per Industry)

Each industry shares a 5-shade UI palette across its subsidiaries:

Shade	Usage	Role
Primary 300	Most saturated	CTAs, primary buttons, interactive elements
100	Lightest tint	Text on dark backdrops
500	Mid-tone	Hover states within buttons
700	Dark	Surface colors on backdrops (cards, panels)
900	Darkest	Full backdrop / background fills

5.4 Neutral Colors

SWATCH	APPROXIMATE HEX	USAGE
Black	#000000	Headlines and text over white background
Neutral 700	~#5F6368	Body copy
Neutral 500	~#9AA0A6	Body copy (secondary)
Neutral 300	~#DADCE0	Disabled elements over white background
White	#FFFFFF	Headlines and text over dark background

5.5 Semantic Colors

PURPOSE	APPROXIMATE COLOR	RULE
Error	Deep red (~#B3261E)	Distinct from Retail red
Warning	Gold/amber (~#E8A000)	—
Success	Teal/green (~#1E8E3E)	Distinct from FSI green

CAUTION

Semantic colors must NEVER be interchangeable with industry colors. For example, do not use a shade of green from the FSI palette as a "success" color.

5.6 Gradient Specifications

Two subsidiaries use gradients for "digitally native" identity:

- **Cymbal Direct:** Lavender/purple (~#9B7EB8) → Pink/salmon (~#E8607A)
- **Cymbal Fintech:** Light blue (~#80C0FF) → Lavender/periwinkle (~#A0A0FF)

5.7 Background Color Rules

- White (#FFFFFF) for content pages
- Black (#000000) for section dividers and dark-mode surfaces
- Industry Primary 900 for full dark backdrops
- Industry Primary 700 for surface cards on dark backgrounds

6. Typography

6.1 Font Family

ROLE	TYPEFACE	SOURCE
Primary & Only	DM Sans	Google Fonts (open source, geometric sans-serif)

DM Sans has friendly letterforms that resonate with the Cymbal wordmark. Low contrast within each letterform provides high legibility at small sizes; geometric "quirks" maintain personality at display sizes.

6.2 Available Weights

WEIGHT	CSS VALUE	USAGE
Regular	400	Display headlines (H1–H4), large display type
Medium	500	Smaller headlines (H5–H6), subtitles, body, captions, buttons
Bold	700	Available for emphasis (not assigned to a specific UI role)

6.3 Complete Type Scale

Headings

LEVEL	WEIGHT	SIZE	USAGE	CASE
H1	Regular	80pt	Website page title only — ONE per page	Sentence case
H2	Regular	60pt	Website section title	Sentence case
H3	Regular	48pt	Website section title	Sentence case
H4	Regular	30pt	Web and mobile card title	Sentence case
H5	Medium	24pt	Mobile app bar title	Sentence case
H6	Medium	20pt	Button text	Sentence case

Supporting Text Styles

STYLE	WEIGHT	SIZE	USAGE
Subtitle 1	Medium	16pt	Supporting title
Subtitle 2	Medium	14pt	Supporting title
Body 1	Medium	18pt	Descriptions
Body 2	Medium	14pt	Descriptions
Caption	Medium	12pt	Assistive text and form labels

6.4 Letter Spacing & Line Height

CONTEXT	LETTER SPACING	LINE HEIGHT
Display Headlines (large)	-4%	1.0
Large Body / Title text	-2%	1.2
Body / Title / Captions	0 (neutral)	1.3

6.5 Type Pairing Rules

- Limit type sizes to **2 or 3 variations** at a time per composition
- Use **large size contrasts** to distinguish hierarchy levels
- Utilize **generous negative space** for legibility
- Use **Regular weight** at larger type sizes
- Switch to **Medium weight** for smaller headlines and body copy

7. Layout System

7.1 Grid System

PROPERTY	SPECIFICATION
Column count	12 columns
Grid type	Flexible and scalable
Column width	Equal-width columns with consistent gutters
Margins	Grid sits inside any applied margins
Hairline rules	Thin solid vertical/horizontal rules aligned to grid — used as graphic dividers

7.2 Negative Space & Breathing Room

- **Core design principle:** generous whitespace is mandatory
- Elements should "spread out" across screens
- Creates "a feeling of brightness and openness"
- ~50% or more of a layout can be intentionally empty
- Do NOT fill all available columns with content

7.3 Line Length & Text Width Rules

RULE	SPECIFICATION
Body text max width	~4–5 columns of the 12-column grid
Readability	Copy must NOT extend across all 12 columns
Alignment	All elements must maintain clear alignment relationships

7.4 Image Rules

RULE	SPECIFICATION
Positioning	Images can sit within margins OR bleed to the edge
Multiple images	Standardize sizes (e.g., all 2-columns wide)
Organization	Groups of images in clear grid patterns (e.g., 4-across rows)
Grid-breaking	Permitted occasionally, but objects should still relate to the column structure
Avoid	Mixing many images at different sizes without organizational structure

7.5 Image-to-Text Ratios

- ~50/50 to 60/40 image-to-text splits
- Text constrained to narrow columns; images can span wider
- Large image blocks placed below or beside text areas

8. UI Components

8.1 Global Border Radius Rules

Element Type	Border Radius
Navigation elements (nav bar, tabs)	0px (rectangular/sharp)
Display elements (cards, dialogs, inputs)	10px
Buttons (Primary, Secondary, FAB)	Full pill/stadium (~20–24px or 50% of height)
Images not at edge of card	2px
Images at edge of card	Clipped to card container (inherits card radius)

8.2 Buttons

Button Variants

Property	Primary	Secondary	Disabled
Background	Primary 300 (industry color)	Transparent/White	Neutral 300 (light gray)
Border	None	1–2px Primary 300	1–2px Neutral 300
Text color	White	Primary 300	Neutral 500/Gray
Shape	Pill/stadium	Pill/stadium	Pill/stadium

Button States

State	Primary	Secondary
Default	Primary 300 fill	Transparent + Primary 300 border
Hover	Primary 500 (darker) fill	Light primary tint fill
Pressed	Primary 300 overlay on top	Primary tint overlay
Disabled	Neutral 300 fill, gray text	Light gray border, gray text

Branded Buttons & FABs

- Shape library shapes can be transformed into buttons
- FABs have higher hierarchy than buttons — apply grey drop shadow for emphasis
- Icon buttons: 48px diameter circles with Primary 300 fill and white icon
- Extended FABs: pill shape with Primary 300 fill, white text + icon

8.3 Text Fields

STATE	BORDER	LABEL COLOR	BACKGROUND	ASSISTIVE TEXT
Default	None/subtle	Gray	Light gray	Gray
Focused	2px Primary 300	Primary 300	White	Gray
Disabled	None/subtle	Muted gray	Dark gray/muted	Muted gray
Error	2px Error Red	Error Red	Dark/black	Error Red

- All text fields use **10px border-radius**

- Floating label animation pattern (label shrinks and floats up on focus)

8.4 Selection Controls

CONTROL	ON STATE	OFF STATE
Checkbox	Primary 300 fill, white checkmark, sharp corners	White, gray border
Radio	Primary 300 fill, white inner dot	White, gray border
Toggle	Primary 300 track, white thumb	Gray track, gray thumb

- Icon style: **Filled and sharp icons** for on-state

8.5 Chips

STATE	BACKGROUND	BORDER	TEXT
Default	White/very light	1px light gray	Dark/black
Hover	Light gray tint	Gray	Dark/black
Pressed	Darker gray	Darker gray	Dark/black
Disabled	Neutral 300	Very faint	Neutral 300–500

- Shape: rounded pill/stadium

- Variant with graphics: small icon/thumbnail on left

8.6 Cards

- **Border radius:** 10px
- **Shadow:** Subtle light drop shadow
- **Variants:** Image-top + text below, image-right + text left, circular thumbnail left + text right
- Images at card edge clip to the card container radius
- Images not at edge have 2px corner radius

8.7 Other Components

COMPONENT	SHAPE	BACKGROUND	KEY DETAILS
Top App Bar	Rectangular (0px radius)	Primary 500	Hamburger menu left, subsidiary logo right, white text
Dialog Box	10px radius	White	H5 title + Body 2 text + Primary + Secondary buttons
Banner	Rectangular	White, light gray border	H6 + Body 2 + chevron icon
Snackbar	10px radius	Dark/near-black	White body text, optional action button
Tooltip	Small rounded rect	Dark/black	White text, compact
Image Lists	Grid of circular thumbnails	—	Circular crop format
Lists	Full-width rows	White	Circular thumbnail (2px radius) + Subtitle 1 + H6 + Body 2

8.8 Navigation Patterns

- **Top App Bar:** Rectangular, Primary 500 background, hamburger menu left, subsidiary logo right
- **Left Sidebar Navigation** (website): Persistent, active state in bold, secondary nav labels as sub-headers
- **Content within scrolling interfaces:** centered when not housed within cards

9. Typography in UI

9.1 Hierarchy Rules

- Use **size contrast** to give hierarchy to elements and messaging
- **Color changes** signal interactive elements or important information
- Clear distinction between larger messaging and smaller CTAs

- Large size contrasts help break down information in an orderly way

9.2 Color in UI Typography

- **Primary 300** (pops of color) signals interactive moments and grabs attention
- Color can emphasize content without changing scale
- **Positive financial values** displayed in Primary 300 (green for FSI)
- Neutral colors (Black, Neutral 700, 500) for standard text

9.3 Rules & Dividers

- Thin rules (hairlines) used to visually divide and organize information
- Vertical rules separate data columns (financial data, specs)
- Horizontal rules separate list items

10. Photography

10.1 Universal Photography Principles

PRINCIPLE	DETAIL
Overall mood	Warmth and humanity
Authenticity	Natural, not overly staged — subjects engaged in relevant activities
Source	Stock photography as primary source
Abstract imagery	Permitted as supplementary (equipment close-ups, product patterns, data visualizations)
Color treatment	Natural color preservation with subtle tonal biases per industry
Diversity	Non-negotiable — ethnicity, age, gender, cultural background must be broadly represented

10.2 Photography Categories

Spatial & Architectural

- Communicate context and environment through texture, action, emotion
- **Subjects:** Building close-ups, human interaction moments, aerial views of activity
- **Composition:** Strong symmetry, leading lines, geometric patterns, bird's-eye views
- **Tonal families:** Warm wood tones (amber, honey) + Cool neutrals (white, grey, glass)
- **Lighting:** Natural/ambient, deep depth of field

- **Orientation:** Mix of looking UP (atriums, spirals) and looking DOWN (aerial pedestrian shots)

Portraiture (Corporate)

- Polished and welcoming, faces centered in composition
- Captured in usual working environment with uncluttered-but-not-sterile backdrop
- **Lighting:** Soft, diffused front-lighting; no harsh shadows
- **Depth of field:** Shallow — subject sharp, background significantly blurred
- **Framing:** Head-and-shoulders to upper chest, consistent aspect ratio (~4:3)
- **Usage:** Cymbal employees or customer/user personas

Avatars (Casual)

- **Casual and unstaged**, captured in the moment
- Outdoor/lifestyle settings, not workplace-specific
- Natural outdoor light (golden hour quality)
- **Framing:** Tighter face crops, designed for circular or square avatar crops
- **Usage:** Profile images in demo UIs

Industry-Specific Imagery

INDUSTRY	COLOR BIAS	SUBJECT FOCUS
HCLS	Blue tones	Lab workers, medical procedures, DNA/molecular imagery, surgical environments
Retail	Red tones	Clothing on racks, warehouses, retail POS, product close-ups, colorful textiles
FSI	Green tones	Stock tickers, financial data screens, meeting rooms, smartphone trading apps, data centers

10.3 Photography Don'ts

- ❌ Overly staged or posed imagery
- ❌ Sterile/clinical backdrops for portraits
- ❌ Cold, harsh lighting
- ❌ Heavily filtered or artificially color-graded images
- ❌ Imagery lacking diversity
- ❌ Imagery disconnected from work/activity contexts

11. Illustration

11.1 Illustration Style

PROPERTY	SPECIFICATION
Overall approach	Geometric / Flat / Shape-based
Construction	Figures, objects, scenes built from basic geometric primitives (circles, ovals, rectangles, rounded rectangles, triangles, leaf/petal shapes)
Rendering	Flat — no gradients, shadows, or 3D effects. All shapes are solid, unshaded color fills
Outlines	None — forms defined by color contrast between adjacent shapes, not by drawn lines
Complexity	Simplified/abstracted real-world subjects reduced to essential geometric silhouettes
Relationship to icons	Geometry alludes to the icon grid, creating cohesion between illustrations and icons

11.2 Color in Illustrations

- **High saturation:** Vivid, bold, fully saturated colors (not muted or pastel)
- **High contrast:** Adjacent shapes use distinctly different hues
- **Multi-color compositions:** Each illustration uses 5–10+ colors simultaneously
- **Brand-palette adherent:** Colors consistent with the Cymbal brand palette
- **Background colors:** Solid colored backgrounds (black, blue, white, olive, cyan, brown) filling the entire frame

11.3 Character/Figure Style

- Built from simple geometric shapes — circular/oval heads, rectangular/trapezoidal torsos, simplified limbs
- No facial features at typical reproduction scale
- Diverse skin tones represented
- Clothing rendered as flat, solid-color geometric blocks
- Slightly stylized proportions (large heads relative to bodies)

11.4 When to Use Illustrations vs Photography

"Illustration may be used instead of photography when we need to communicate more abstract concepts, e.g. when visualizing Cymbal's values, commitments, and responsibilities."

- **Use illustration for:** Abstract concepts, brand values, commitments, corporate responsibility, conceptual storytelling, celebratory moments

- **Use photography for:** Concrete, real-world subjects where authenticity matters (default)

11.5 Illustration Composition

- Centered/symmetrical compositions for single subjects
- Scene-based horizontal arrangements for groups
- Full-bleed color backgrounds
- Tight cropping — subjects fill the frame; some extend beyond edges
- No borders or frames
- Large, bold shapes dominate — no fussy small details

12. Motion & Animation

12.1 Page Transitions

- Brand shapes used as **supergraphics** to create transitions between pages
- **Morph/expand animation:** Small circle grows into a large arch/semicircle that fills the viewport, revealing a new page
- Shape color corresponds to the industry/subsidiary color

12.2 Progress Indicators

TYPE	DESCRIPTION
Physics	Wireframe geometry (dashed construction lines) animates to form solid filled shapes resembling the Cymbal logomark geometry
Fill	Abstract brand shapes grow/fill within a circular container (dark shapes on light tinted background)

- Used for asynchronous actions that don't require page transitions

- Feature interaction between generic brand shapes and shape formations

13. Applications & Brand Touchpoints

13.1 Print/Editorial Layouts

- **Primary graphic device:** Large semicircular/arc shape used as photo mask and color block, bleeding off page edges
- CC logomark can be used at massive oversized scale as layout element
- Multi-column grid with thin vertical rule dividers

- Numbered sections ("01", "02") with lorem ipsum body copy
- Mix of photography and graphic elements on same spread
- Wordmark placement: top-left or bottom-right

13.2 Sub-Brand Print Collateral

Each sub-brand uses:

- Its own accent color applied to the arc/circular shape device
- The arc/circular shape is the unifying graphic element across all verticals
- Sub-brand logos always placed in top corners
- Headlines can overlay colored arc shapes (white text on color)
- Identical structural layout system, differentiated by color identity

13.3 Corporate Website

- **Hero section:** Full-bleed photography with white wordmark overlay, upper-right quadrant
- **Navigation:** Hamburger menu only (minimal chrome), left sidebar for interior pages
- **Footer element:** CC logomark persistent bottom-left
- **Interior pages:** Left sidebar nav with active state in bold, content area with text + media
- **Portrait masks:** Circular crop for leadership/team photos
- **Values content:** Flat illustration style (colorful, diverse, inclusive)

13.4 Digital Signage & Wayfinding

- Two-panel layout: white info panel (date/time/location) + black wayfinding panel (directional arrows)
- Bold stacked typography for date/time
- White geometric arrow icons for directions
- CC logomark prominent on information panel
- Grid-based layout with vertical and horizontal rule dividers

13.5 Corporate Merchandise

Lanyard:

- Black nylon strap with alternating white CC logomark and "Cymbal" wordmark, repeated

ID Badge:

- White card, portrait orientation, rounded corners
- CC logomark with holographic/iridescent finish (security feature)
- Employee photo + name + title + "Cymbal" wordmark
- Clean minimal layout

13.6 Mobile App UI

- **Themeable design system:** Identical layout and components with swappable color palettes
- **Header:** Dark industry color (Primary 500/700/900) as app bar
- **Buttons:** Outlined style (green/blue/red border + text) or filled
- **Charts:** Industry-color palette bar charts
- **Chat UI:** Alternating bubble colors (industry color for bot, light grey for user)
- **FAB:** Industry Primary 300 circle with white icon

13.7 Google TV / Monitor Interfaces

- Widescreen landscape format
- Card-based layout with generous white space
- Industry color applied to accents, CTAs, and arc shape elements
- Embedded video/media cards with play button overlay
- Flat illustration for celebratory/emotional moments
- Google Assistant integration bar at bottom

13.8 Color Theming System

The entire UI system is **themeable** — identical components swap color palettes:

THEME	HEADER COLOR	ACCENT COLOR
Green (FSI)	~#1B5E20 dark green	Bright green
Blue (HCLS)	~#1A237E deep navy	Bright blue
Red (Retail)	~#B71C1C dark crimson	Pink/red

14. Design Resources

RESOURCE	PLATFORM	STATUS
Cymbal on Google Standards	Google Standards	Coming Soon
Cymbal Moonbase	Internal platform	Available (linked)
Figma File	Figma	Available (linked)

15. Quick Reference — Key Brand Rules Summary

TIP

For AI agents generating on-brand content, always ensure:

1. **Logo colors:** Black or white ONLY — never colored
2. **Typography:** DM Sans exclusively (3 weights: Regular, Medium, Bold)
3. **Subsidiary wordmarks:** ITC Avant Garde Bold — never for general text
4. **Industry colors:** Blue = HCLS, Red = Retail, Green = FSI
5. **Shapes:** 1–4 rounded geometric shapes per composition, derived from the icon grid
6. **Photography:** Warm, diverse, naturalistic, industry-toned
7. **Illustration:** Flat, geometric, no outlines, high-saturation multi-color
8. **Layout:** 12-column grid, generous negative space (~50%), body text ≤5 columns wide
9. **UI corners:** 0px for navigation, 10px for cards/inputs, pill-shape for buttons
10. **Semantic colors are sacred:** Never swap with industry colors
11. **Arc/semicircle supergraphic:** The unifying visual device across all touchpoints
12. **Brand personality:** Approachable, warm, geometric, modern, human-centric
